

SCENARIO BASED QUESTIONS

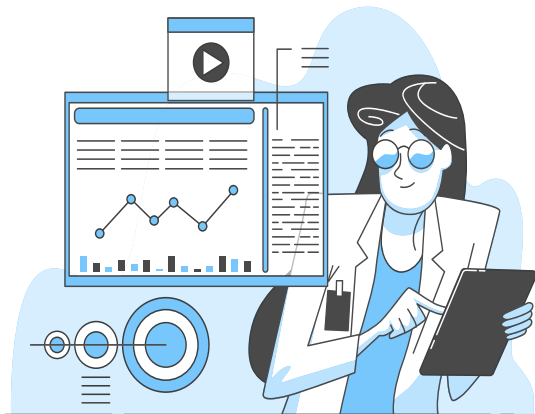

How to work through
them

SCENARIO BASED QUESTIONS

The Scenario

01

...

Acme Computers creates white-label computer accessories and utilizes Salesforce for their sales and service departments. As a part of their updated features, they are adding a partner experience site. In addition, they want to be able for an external partner to share access to product customization records with other users. This feature requirement all takes place in the new custom interface our team developed with Lightning Web Components, and the shared access needs to be persisted throughout the system. How can we meet this need?

SCENARIO BASED QUESTIONS

02

Remove The Noise & Rephrase

...

Acme Computers creates white-label computer accessories and utilizes Salesforce for their **sales** and **service** departments. As a part of their updated features, they are adding a **partner experience site**. In addition, they want to be able for an **external partner** to **share access** to product customization **records** with other **users**. This feature requirement all takes place in the new custom interface our team developed with **Lightning Web Components**, and the shared **access needs to be persisted** throughout the system. How can we meet this need?

SCENARIO BASED QUESTIONS

02

Remove The Noise

...

sales and service partner experience site. external partner to share access to records with other users. with Lightning Web Components, and access needs to be persisted

SCENARIO BASED QUESTIONS

02

Rephrase

...

sales and service partner experience site. external partner to share access to records with other users. with Lightning Web Components, and access needs to be persisted

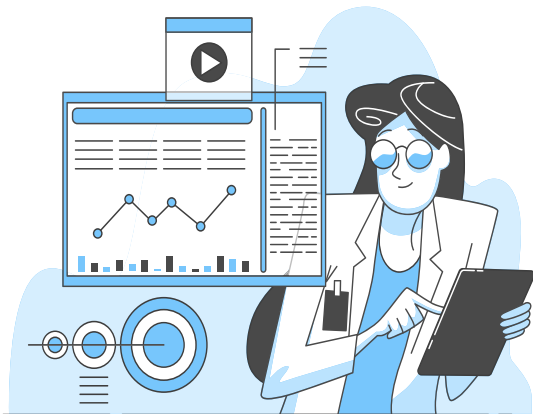

- External User needs to share record access to other users.
- Must be done through an LWC experience site.

SCENARIO BASED QUESTIONS

The Answers

03

- Utilize report folders and grant the external user manage access to the folder containing a report with these records.
- Develop a custom button component that allows for user selection and then calls on an apex method passing it the selected user to create a new share record.
- Edit the page layout of the object to ensure the share button is visible, and then assign the page layout to the external partner profile.
- Recalibrate the sharing hierarchy to apply torque to the external genealogy. This will enable external hydrofoils to enter into the shared position which must then be locked using the sprocket setting.

SCENARIO BASED QUESTIONS

04

Remove The Noise, Part Deux

- Utilize report folders and grant the external user manage access to the folder containing a report with these records.
- Develop a custom button component that allows for user selection and then calls on an apex method passing it the selected user to create a new share record.
- Edit the page layout of the object to ensure the share button is visible, and then assign the page layout to the external partner profile.
- Recalibrate the sharing hierarchy to apply torque to the external genealogy. This will enable external hydrofoils to enter into the shared position which must then be locked using the sprocket setting.
