Recommended Trailhead Badges

This document contains a list of recommended/related Trailhead badges for all topics taught throughout training. This is a living document - Trailhead is always releasing new badges for us to evaluate and include, so badges that have been recently added to this file will be italicized. Additionally, trails that contain badges that must be completed in a certain order have been combined into a single entry and marked as such.

At your trainer's discretion, they may assign required badges - this document is by no means a complete list of badges you may be given during training or the ultimate authority on whether you are required to complete a badge. Lastly, there are currently over 160 badges in this document - if you're looking to delve deeper or refresh on a certain topic, CTRL+F and relative links are your friends!

New in Version 3.0: After 500 times of scrolling through this PDF, I finally realized "hey, what if I didn't make myself do this?" And thus, a table of contents and relative links. As always, new badges are italicized.

Table of Contents

Administration
